SUBJECT

English

UNIT

3 of 5

BOOK

Pathfinder

Based on Orient BlackSwan Pathfinder | Designed for Engineering Students

About the Subject: Biography as a Literary Form

What is a Biography?

A **biography** is a detailed account of a person's life written by someone else. It covers the subject's birth, education, career, achievements, relationships, and impact on society. Unlike fiction, biographies are based on facts, interviews, research, and real events.

KEY FEATURES OF A BIOGRAPHY

- **Factual:** All events and dates are real and verified.
- **Chronological:** Usually follows a time-based order.
- **Third-person narration:** Written as "he/she/they" not "I".
- **Inspirational:** Shows how real people overcame challenges.

- **Detailed background:** Covers childhood, education, career, legacy.

About the Lesson – Elon Musk

The lesson "*Elon Musk*" appears in the **Pathfinder** textbook published by **Orient BlackSwan**. It is a factual biography written in a journalistic, informative style. The writing is direct and structured, making it easy for readers to understand Musk's journey from a curious young man in South Africa to one of the world's most influential technology entrepreneurs.

KEY CONTRIBUTIONS OF ELON MUSK

- Founded or co-founded: Zip2, X.com (PayPal), SpaceX, Tesla, Neuralink, The Boring Company
- Pioneered reusable rockets and electric vehicles
- Advocate for clean energy, Mars colonisation, and neural technology
- Acquired and renamed Twitter as **X**

Summary of the Lesson – Elon Musk

Early Life and Education

Elon Reeve Musk was born on **28 June 1971** in **Pretoria, South Africa**. From a young age, he showed an insatiable curiosity and a strong interest in computer programming. After his parents divorced, he lived with his father, an electromechanical engineer, who greatly influenced his early interests. Musk later immigrated to **Canada** and then attended the **University of Pennsylvania**, earning a dual bachelor's degree in **Physics and Economics**.

Key Milestones – Timeline

1995

Founded **Zip2** – an online city guide for newspapers while at university.

1999

Sold Zip2 to Compaq for **\$300 million**. Founded **X.com** (later PayPal).

2002

eBay acquired PayPal for **\$1.5 billion**. Musk earned over \$175 million. Founded **SpaceX**.

2004

Joined **Tesla Motors** as chairman; later became CEO.

2008

SpaceX launched **Falcon 1** – first privately developed rocket to orbit.

2016

Founded **The Boring Company** and co-founded **Neuralink**.

2022

Launched first privately funded manned mission. Acquired Twitter (renamed **X**).

Founded in 2002 to reduce space transportation costs and colonise Mars. Launched Falcon 1 (2008), Falcon 9 (2010), and the Starship spacecraft. Goal: make humanity multi-planetary.

Joined 2004. Produced Tesla Roadster (2008), Model S, and Model 3. Aimed to accelerate the world's transition to sustainable energy through electric vehicles, Powerwall, and Solar Roof.

Founded 2016. Develops underground transportation tunnels to address urban congestion. Project: Las Vegas Convention Centre Loop with autonomous electric vehicles.

Co-founded 2016. A nanotechnology start-up that aims to integrate the human brain with AI by manufacturing brain-embedded devices to treat neurological disorders.

Conclusion of the Lesson

Elon Musk's journey from South Africa to a multi-billionaire tech mogul is a testament to his **innovation, vision, and determination**. His hands-on approach and willingness to pursue ambitious goals in the face of criticism have made him a pioneering figure. His ideas continue to shape the future of technology, science, and industry.

KEY TAKEAWAYS

- Early curiosity + self-teaching → foundation for entrepreneurship
- Risk-taking: invested all PayPal earnings into SpaceX and Tesla
- Resilience: both companies nearly went bankrupt multiple times
- Vision beyond profit: clean energy, space exploration, brain-computer interface
- Innovation in multiple industries simultaneously

Glossary of Important Words

insatiable

too great to be satisfied

penchant

a liking for something

precursor

something that existed before another

kick-start

to make something happen

windfall

money received suddenly

disrupt

prevent something from continuing as usual

sustainable

least damaging to the environment

cognition

use of conscious mental process

mogul

an important, rich and powerful person

testament

proof

indelible

impossible to erase

unwavering

steady; unchanging

mitigation

reduction

scrutiny

a careful and detailed examination

advocate

to publicly support an idea

neurological

relating to the nerves

A. Writing Skills – Paraphrasing

Paraphrasing means rewriting a piece of text in your own words while keeping all important information and not altering the original meaning.

HOW TO PARAPHRASE (5 STEPS)

1. **Understand:** Read the original passage multiple times until you fully understand it.
2. **Make notes:** Jot down key points (do not copy entire sentences).
3. **Paraphrase:** Set aside the original and write a new passage from your notes.
4. **Review:** Compare your passage with the original to ensure you haven't changed the meaning.
5. **Record:** Note the source (author, book, page number) for reference.

How to Rewrite Sentences (Without Changing Meaning)

- Change sentence structure: switch between simple, compound, and complex sentences.
- Break up sentences; rearrange clauses; alter sentence length.
- Switch between active and passive voice.
- Use synonyms of words.

B. Writing Skills – Summarising

A **summary** is a shortened version of a text written in the summariser's own words. It differs from paraphrasing in that it gives only the **main ideas (gist)**, not a point-by-point rephrasing.

Purpose of Summaries

- Saves the reader's time
- Helps scholars check relevance of material
- Helps focus on what is pertinent
- Improves retention and recall

How to Write a Summary

1. Read the passage carefully
2. Identify the subject and main points
3. Write notes in numbered form
4. Write draft in your own words
5. Edit: cut repetitions, omit examples
6. Check length; make a neat copy

SHORTENING SENTENCES – QUICK TIPS

Original

Shortened

They welcomed the person they did not know.

They welcomed the stranger.

Working with others to achieve something is the best way to ensure success.

Cooperation is the best way to ensure success.

Her handwriting could not be read.

Her handwriting was illegible.

He is able to do things by himself without help.

He is independent.

C. Writing Skills – Note-Making

Note-making involves **three steps**:

1. **Identify** the essential points of a passage.
2. **Record** those points clearly.
3. **Organise** them in a manner useful for revision.

COMMON ABBREVIATIONS USED IN NOTE-MAKING

- & or + → and
- → or >> → leads to / results in
- = → equals / is the same as
- ≠ → does not equal
- ∴ → therefore
- approx or ~ → approximately
- e.g. → for example
- i.e. → that is / in other words
- etc. → and so on
- esp. → especially
- w/ → with
- w/o → without

D. Reading Skills – Drawing Inferences

When reading a text, we not only absorb information but also **draw inferences** — arrive at conclusions based on evidence and reasoning.

HOW TO DRAW INFERENCES WHILE READING

- **Read critically:** Evaluate information instead of simply accepting it.
- **Make connections:** Link what you already know to what you're reading.
- **Predict:** Make quick predictions about what comes next; revise as you read.
- **Draw conclusions:** Make judgements and form opinions based on evidence from the text.

E. Speaking Skills – Group Discussions

In the lesson, students learn how to discuss topics in groups and then **report what was discussed**.

USEFUL PHRASES TO AGREE

USEFUL PHRASES TO DISAGREE

- "I agree."
- "Absolutely!"
- "That's true."
- "You're quite right!"

- "I'm sorry, but I don't agree."
- "I'm afraid I have to contradict you."
- "Excuse me, but I think..."
- "Look at it from this angle..."

REPORTING A DISCUSSION – KEY VERBS TO USE INSTEAD OF "SAID"

When reporting a discussion, use: *felt, agreed, disagreed, argued, explained, retorted, emphasised, declared, stated, remarked, commented*. This adds variety and precision to your report.

Grammar – Verbs, Tenses & Subject-Verb Agreement

Types of Verbs

MAIN VERBS (LEXICAL VERBS)

The building blocks of language. Examples: *eat, play, study, teach*.

Finite verbs: Must agree with subject in person/number.

Non-finite verbs: Do not change with the subject (infinitives, participles).

AUXILIARY VERBS (HELPING VERBS)

Support the main verb. Examples: *am, is, are, was, were, have, has, had, will, shall, do, does, did*.

*I **am eating** breakfast.* (am = auxiliary; eating = main)

All Tenses at a Glance

Tense	Formula	Example
Present Simple	V / V+s	The sun rises in the east.
Present Progressive	am/is/are + V-ing	She is reading a book.
Present Perfect	have/has + V3	I have cleaned the table.
Present Perfect Progressive	have/has been + V-ing	He has been playing for two hours.
Past Simple	V+ed / V2	Water flowed down the slope.
Past Progressive	was/were + V-ing	I was watching a film last night.
Past Perfect	had + V3	I had spoken before I wrote.
Past Perfect Progressive	had been + V-ing	Arjun had been reading when the bell rang.
Future Simple	will/shall + V	I will leave tomorrow.
Future Progressive	will be + V-ing	I will be leaving at that time.
Future Perfect	will have + V3	I will have left by the time you arrive.
Future Perfect Progressive	will have been + V-ing	By 2025, I will have been teaching for 15 years.

Subject-Verb Agreement – Special Rules

KEY RULES TO REMEMBER

1. **Two singular subjects joined by 'and'** → Plural verb.
The president and vice president are coming.
2. **Two nouns refer to the same person** → Singular verb.
The president and chief executive has arrived.
3. **Two nouns joined by 'and' as a single concept** → Singular verb.
Rice and curry is my favourite.
4. **Either/or, Neither/nor with two singulars** → Singular verb.
Either Ram or Shyam is responsible.
5. **Either/or, Neither/nor with two plurals** → Plural verb.
Either the boys or their friends have written this.
6. **Everyone, someone, no one, nobody** → Singular verb.
Everyone wants to succeed.
7. **Uncountable nouns (baggage, furniture, equipment)** → Singular verb.
Your baggage is heavy.
8. **Nouns ending in -s but plural in meaning (trousers, spectacles)** → Plural verb.
His trousers have become too tight.
9. **Amount/quantity as a whole** → Singular verb.
Ten thousand rupees is a fair price.

Vocabulary – Compound Words

A **compound word** is two or more words linked together to produce a word with a new meaning.

Parts	Compound Word	Class
arm + chair	armchair	Noun
book + mark	bookmark	Noun
head + ache	headache	Noun
ground + breaking	groundbreaking	Adjective
sleep + walk	sleepwalk	Verb
never + the + less	nevertheless	Adverb
any + one	anyone	Pronoun
in + to	into	Preposition

Vocabulary – Collocations

A **collocation** is a combination of words commonly used together. They sound natural; wrong collocations sound odd.

EXAMPLES OF CORRECT COLLOCATIONS

- *sincere* apology (NOT honest apology)
- *warm* welcome (NOT hot welcome)
- *fulfil* a promise (NOT complete a promise)
- *make* a mistake (NOT do a mistake)
- *reap* benefits (NOT sow benefits)
- *make* a difference (NOT bring a difference)
- *pay* sympathy to (NOT have sympathy for)
- *click on* an icon (NOT press an icon)
- *have* a conversation (NOT make a conversation)
- *play* a part (NOT do a part)

+ Additional Topic – Entrepreneurship & Innovation

Entrepreneurship: Lessons from Elon Musk

Elon Musk's life is a powerful example of **entrepreneurship** — the process of designing, launching, and running a new business. His story teaches us several important values:

- **Risk-Taking:** Musk invested nearly all his fortune into SpaceX and Tesla despite predictions of failure.
- **Resilience:** Both companies nearly went bankrupt. He persisted because he believed in the mission, not just profit.
- **Innovation:** He constantly introduced ideas that disrupted existing industries (automotive, space, finance).
- **Long-term thinking:** While others focused on short-term gains, Musk focused on civilisational goals like Mars colonisation.

REAL-LIFE APPLICATION

Engineering students can apply these lessons by: starting with small projects (like Musk's Zip2), learning to fail forward, seeking mentors in their field, and thinking beyond grades to long-term contributions to society.

Exam Tips & Strategy

WRITING GOOD ANSWERS

- Start with a one-line definition or introduction.
- Use facts, dates, and names from the lesson for credibility.
- Write in clear, simple English — avoid over-complicating.
- End every long answer with a conclusion or key message.
- For 2-mark questions: 2–3 sentences are enough.
- For 5-mark questions: at least 150–200 words with examples.

COMMON MISTAKES TO AVOID

- Do NOT write a paraphrase instead of a summary.
- Do NOT mix up tenses in the same paragraph.
- Do NOT forget subject-verb agreement in grammar questions.
- Do NOT use incorrect collocations (e.g., "do a mistake").
- Do NOT copy full sentences from the passage in comprehension answers.

TIME MANAGEMENT IN EXAMS

- Read all questions first (2 minutes) — choose wisely.
- Spend ~5 minutes per 2-mark answer.
- Spend ~12–15 minutes per 5-mark long answer.
- Save 5–10 minutes at the end for reviewing grammar answers.
- Attempt all questions — partial marks are better than blank answers.

Short Answer Questions with Answers (2 Marks)

1

Where and when was Elon Musk born? What inspired his early interest in technology?

Elon Reeve Musk was born on **28 June 1971** in **Pretoria, South Africa**. From a young age, he displayed an insatiable curiosity and a strong interest in **computer programming**. His father, an electromechanical engineer, greatly influenced his early interests in science and technology.

2 What was Zip2 and what happened to it?

Zip2 was an internet company that provided online business directories and maps for newspapers. Musk co-founded it while at university in 1995. It eventually prospered and was **acquired by Compaq for over \$300 million in 1999**. Musk used his share of the sale to kick-start his further business ventures.

3 How did X.com lead to the creation of PayPal?

In **1999**, Musk founded **X.com**, an online financial services company. X.com later became **PayPal**, which facilitated online transactions and revolutionised e-commerce. In **2002**, eBay acquired PayPal for \$1.5 billion, earning Musk over \$175 million.

4 What is SpaceX and what are its major achievements?

SpaceX (Space Exploration Technologies Corp.) was founded by Musk in 2002 with the goal of reducing space transportation costs and enabling human colonisation of Mars. Major achievements include: launching **Falcon 1** in 2008 (first privately developed rocket to orbit), **Falcon 9** in 2010 (reusable), and the first privately funded manned mission to orbit in **2022**.

5 What is Tesla's contribution to the automotive industry?

Tesla aimed to accelerate the world's transition to sustainable energy in the automotive sector. Under Musk's leadership, Tesla produced the **Roadster** (2008, world's first high-performance electric car), **Model S** (disrupted the luxury market), and **Model 3** (2017, affordable for the masses). Tesla also developed sustainable energy products like Powerwall, Powerpack, and Solar Roof.

6 What is Neuralink and what does it aim to do?

Neuralink is a nanotechnology start-up co-founded by Musk in **2016**. It aims to integrate the human brain with artificial intelligence by manufacturing devices that can be embedded in the brain. The goal is to facilitate brain-machine interfacing, treat **neurological disorders**, and enhance human cognition.

7 What is the difference between paraphrasing and summarising?

Both involve restating the language of a passage in your own words. However, a **paraphrase** is a point-by-point rephrasing of the original and is usually *similar in length*. A **summary** gives only the *gist* (main ideas) of the passage and is much shorter — typically one-third of the original.

8

What are collocations? Give two examples.

A **collocation** is a combination of words that are commonly used together in English and sound natural due to long, established usage. Wrong collocations sound unnatural even if they are grammatically correct. Examples: *make a mistake* (NOT "do a mistake"), *fulfil a promise* (NOT "complete a promise").

Long Answer Questions with Answers (5–10 Marks)

1 How have Tesla and Hyperloop radically revolutionised transportation? (5 Marks)

Elon Musk's ventures into transportation have been truly revolutionary, challenging both established industries and the boundaries of what is considered possible.

Tesla's Revolution: When Musk joined Tesla Motors in 2004, the prevailing belief was that electric cars were slow, impractical, and ugly. Tesla shattered this myth with the **Roadster** (2008), the world's first high-performance electric car. The subsequent **Model S** disrupted the luxury car market, earning critical acclaim and proving that electric vehicles could be superior to petrol-powered cars in every way. The **Model 3** (2017) made electric vehicles affordable for the masses. Tesla's energy division, with products like **Powerwall** and **Solar Roof**, has transformed how people generate and store electricity. By making electric vehicles desirable and practical, Tesla accelerated the entire automotive industry's shift towards sustainable energy.

Hyperloop's Vision: Musk proposed the **Hyperloop**, a high-speed transportation concept that would move passengers in pods through low-pressure tubes at near-airline speeds. While still in development, Musk's ideas have inspired numerous start-ups and projects globally. The concept could potentially revolutionise long-distance travel, reducing journey times significantly while consuming far less energy than current modes of transport.

Together, Tesla and Hyperloop represent Musk's vision of an integrated, sustainable transportation ecosystem — one where cars, energy, and intercity travel all work together to create a cleaner world.

In what way has Musk proved to be a visionary leader of cutting-edge technology? Discuss with relevant examples. (10 Marks)

Elon Musk has proved himself to be one of the most visionary leaders of the 21st century through his ability to identify future needs of humanity and work relentlessly to solve them, often decades before others recognise the problem.

1. Vision for Sustainable Energy (Tesla): When most of the world was still dependent on fossil fuels, Musk understood that climate change required urgent action. He joined Tesla in 2004 and transformed it from a small start-up into the world's most valuable automotive company. His vision extended beyond electric cars to include Powerwall home batteries and Solar Roof tiles — creating an integrated sustainable energy ecosystem.

2. Pioneer in Private Space Exploration (SpaceX): In 2002, space exploration was exclusively the domain of government agencies. Musk founded SpaceX with the audacious goal of colonising Mars and making humanity a multi-planetary species. Despite near-bankruptcy and multiple rocket failures, SpaceX achieved the impossible: launching **Falcon 1** (first privately developed rocket to orbit), developing reusable rockets with **Falcon 9**, and launching the first privately funded manned orbital mission in 2022.

3. Disrupting Finance (PayPal): In the 1990s, Musk recognised that the internet could transform financial services. X.com, which became PayPal, revolutionised e-commerce by enabling secure online transactions at a time when people were still sceptical of buying things online.

4. Neural Technology (Neuralink): Musk recognised early that the greatest challenge of the AI age would be keeping humans relevant in a world dominated by machine intelligence. Neuralink's brain-computer interface technology could one day treat paralysis, blindness, and neurological disorders while enhancing cognitive capabilities.

5. Urban Transportation (The Boring Company): Musk identified urban traffic congestion as a major problem and proposed a bold solution: a network of underground tunnels for autonomous electric vehicles. The Las Vegas Convention Centre Loop is an early realisation of this vision.

Conclusion: What sets Musk apart as a visionary leader is not just his ideas, but his willingness to invest his own capital, time, and reputation to see those ideas through. His *hands-on approach* — from engineering details to design choices — and his tolerance for extreme risk make him a defining figure of our era. His influence goes beyond his companies; he has changed how the world thinks about the future.

3 Describe Musk's early years and how they inspired his interest in business and technology. (5 Marks)

Elon Musk's early years were marked by an extraordinary intellectual curiosity that would later define his career as one of the world's greatest innovators.

Born on **28 June 1971 in Pretoria, South Africa**, Musk showed an insatiable curiosity from a young age. He taught himself computer programming and, by the age of 12, had created a video game called "Blastar" and sold it for \$500 — an early indication of his entrepreneurial instinct. His father, an electromechanical engineer, greatly influenced his interest in technology, machines, and how things work.

After his parents divorced, Musk's life became more challenging, but he channelled his energy into books and learning. He reportedly read encyclopaedias and science fiction voraciously, which fuelled his imagination about the future. After completing high school in South Africa, he immigrated to **Canada** to pursue better opportunities.

At the **University of Pennsylvania**, Musk earned a dual bachelor's degree in **Physics and Economics** — a combination that gave him both the scientific rigour and the business acumen to think about grand technological problems in practical terms. While in university, he co-founded **Zip2** in 1995, an internet city guide for newspapers — his first real venture into entrepreneurship.

These early experiences — intellectual curiosity, a technical upbringing, self-teaching, immigration, and early entrepreneurship — created the foundation upon which Musk built his empire. They instilled in him a belief that with enough determination and intelligence, even the most ambitious goals are achievable.

4

Write a note on Verbs and Tenses as covered in Unit 3. (5 Marks)

A **verb** is a word that denotes action (e.g., sit, play, work) or a state of being. There are two major types: **main verbs** (lexical verbs) and **auxiliary verbs** (helping verbs).

Tense refers to the different forms of a verb that tell us *when* the action referred to happens — before, at the time of, or after the moment of speech.

There are three primary time frames — **Present, Past, and Future** — each with four aspects: Simple, Progressive, Perfect, and Perfect Progressive, giving us **12 tense forms in total**.

The **Present Simple** (V/V+s) is used for eternal truths, habitual actions, and to describe things. The **Past Simple** (V+ed/V2) describes completed past actions. The **Future Simple** (will + V) indicates future actions.

Progressive forms indicate ongoing actions. Perfect forms indicate completed actions with relevance to another time. Perfect progressive forms indicate ongoing actions that began at an earlier time.

Understanding tenses is crucial for clear communication, accurate writing, and success in English grammar examinations. In the context of Unit 3, the biography of Elon Musk itself demonstrates multiple tenses — Past Simple for completed events, Present Simple for general truths about his companies, and Future references for ongoing projects like Starship.

Previous Year Pattern Questions (JNTUK Style) with Answers

JNTUK EXAM PATTERN (R23)

Questions are typically: **Section A** – Short answers (2 marks each, ~50 words); **Section B** – Long answers (5–10 marks, ~200 words). Grammar and vocabulary carry 15–20 marks. Reading comprehension and writing skills are tested separately.

Briefly describe two of Musk's early business ventures. (Section A – 2 Marks)

Zip2 (1995): Musk's first venture, which provided online business directories and maps for newspapers. It was eventually acquired by Compaq for over \$300 million, giving Musk the capital to pursue future ventures.

X.com / PayPal (1999): Musk founded X.com, an online financial services company. It later became PayPal, which revolutionised e-commerce by enabling secure online transactions. eBay acquired it for \$1.5 billion in 2002.

Fill in the blanks with the correct tense of the verb in brackets: "The sun _____ (rise) in the east. She _____ (study) since morning." (Grammar – 2 Marks)

1. The sun **rises** in the east. (Present Simple – eternal truth)
2. She **has been studying** since morning. (Present Perfect Progressive – action that started in the past and is still continuing)

What is SpaceX and what has been its impact on space exploration? (Section A – 2 Marks)

SpaceX (Space Exploration Technologies Corp.) was founded by Musk in 2002 to reduce space transportation costs and enable Mars colonisation. Its impact includes: launching the first privately developed rocket to reach orbit (Falcon 1, 2008), developing the reusable Falcon 9, and launching the first privately funded manned orbital mission in 2022. SpaceX has fundamentally transformed space exploration from a government-exclusive domain to a private industry.

Choose the correct collocation: "She made / did a mistake in the calculation." Justify your answer. (Vocabulary – 1 Mark)

The correct collocation is "**made a mistake**". In English, the verb *make* collocates with *mistake* — this is a fixed language chunk that sounds natural due to long-established usage. "Did a mistake" is grammatically understandable but sounds unnatural to a native English speaker and is considered incorrect.

Identify the tense of the underlined has been this watch for quite some time now." portion: "She wearing (Grammar – 1 Mark)

The tense is **Present Perfect Progressive** (have/has been + V-ing). It describes an action that began at some point in the past and is still continuing in the present moment. The clue is the phrase "for quite some time now."

What is subject-verb agreement? Apply the rule to: "Neither the teacher nor the students _____ (know) the answer." (Grammar – 2 Marks)

Subject-verb agreement means that the form of the verb must match the subject in number and person. In simple present tense, a singular subject takes V+s and a plural subject takes the base form of the verb.

For "Neither ... nor" constructions, when the second subject (closest to the verb) is plural, the **plural verb** is used. So: "Neither the teacher nor the students **know** the answer." (The students = plural → plural verb).

Conclusion & Motivational Closing

Recap of Unit 3 – Biography (Elon Musk)

Unit 3 of JNTUK R23 English (Pathfinder) offers a rich, multidimensional learning experience:

CONTENT COVERED

- Biography of Elon Musk – inspiration and innovation
- Listening for global comprehension
- Group discussions and reporting techniques
- Drawing inferences from texts
- Paraphrasing, Summarising, Note-making
- Verbs, Tenses, Subject-Verb Agreement
- Compound Words and Collocations

KEY LESSONS FOR LIFE

- Curiosity is the seed of innovation
- Resilience turns failure into fuel
- Ambition without action is a dream; action without ambition is just activity
- Think beyond today — solve tomorrow's problems
- Language skills open doors that degrees alone cannot

*"When something is important enough, you do it
even if the odds are not in your favour."*

— Elon Musk

As engineering students, your journey has just begun. Like Musk, start small, stay curious, and never stop learning. The future belongs to those who build it. **All the best for your exams!** 🚀
